Application Number	Title	Application Date	Status
202541065052	SPACE DEBRIS DETECTION MODEL USING LIDAR	08/07/2025	Published
202541058670	Mini Satellite For Weather Monitoring & Location Tracking using LoRa	18/06/2025	Published
202541058671	Self-Guided Aerial Glider for Passive Flight and Real-Time Navigation	18/06/2025	Published
202541054775	Method and System for Molecular-Scale Imaging and Therapeutic Evaluation of Biological Tissues Using Acoustic Wavefield Inversion and Vibrational Signature Superposition	06/06/2025	Published
202541054776	Method and system for whole-body diagnostic imaging via acoustic tomography and inverse wavefield modeling of multidimensional vibrational response.	06/06/2025	Published
202541054777	Method and system for molecular- and cellular-scale imaging of biological tissues via acoustic vibrational response reconstruction.	06/06/2025	Published
202541054778	Advanced method and integrated system for personalized acoustic-vibrational therapeutic intervention via multi-dimensional separation and dynamic application of individual-specific and universal biomolecular vibrational factors using inverse wavefield modeling and deep neural network architectures.	06/06/2025	Published
202541054779	Method and system for molecular- and cellular-scale imaging of biological tissues via acoustic vibrational response reconstruction employing inverse wavefield modeling and neural networks	06/06/2025	Published
202541052985	Advanced Material Systems for Miniaturized Reaction Wheels in CubeSat Attitude Control	31/05/2025	Published
202541052986	Hybrid Cloud Architecture for AI-Enhanced Ocean Data Mapping from Satellite Ground Stations	31/05/2025	Published
202541047170	Conversion of Sanskrit Tokens into Vectors Based on the Grammarian Principles by Panini and Sound Knowledge from Maheshwari Sutrani	16/05/2025	Published

Total Document(s): 22

Page: [First](#) <

Application Number	Title	Application Date	Status
202541047171	Design of Mathematical Framework for a Quantum Computer Proving Simultaneous Position and Velocity of Quanta	16/05/2025	Published
202541047172	Alternate to Attention-Based Layers Using Language Principles in Sanskrit for Enhanced Natural Language Processing Models	16/05/2025	Published
202541046601	Derivation of Vector Mathematics for Intelligence Based on Permutations and Combinatorial Metrics from Sri Rudram Phrases with Principal Component Analysis (PCA)	14/05/2025	Published
202541046602	Development of Electronics and Subsystems for Deep Space Exploration Programs Using Parabolic Trajectories	14/05/2025	Published
202541046603	Development of Nano Nozzles for Rocket Engines for Deep Space Exploration	14/05/2025	Published
202541035951	Design of Electronics for the Quantum Computing Framework Demonstrating Simultaneous Position and Velocity of Quanta	14/04/2025	Published
202541031205	Structural Testing Methodology for Long Operational CubeSat Programs	29/03/2025	Published
202541031206	Removal of External Memory and Expansion of Complete Memory as a Hash Map of Registers Within the CPU	29/03/2025	Published
202541031207	Design of a Predictive Memory Allocator for Optimizing Memory Usage in Programming Languages	29/03/2025	Published
202541028395	Replication Factors in CubeSats as a Replacement for Larger Satellites	26/03/2025	Published
202541027551	Efficient Management of Social Networking Principles for Dynamic Application Network Clustering for Effective Governance	25/03/2025	Published
